The Honorable Lisa Murkowski
Chairman
Senate Committee on Energy and Natural Resources
709 Hart Senate Office Building
Washington, DC 20510

Re: IECA Supports S. 1221, the “Bulk-Power System Reliability Impact Statement Act”

Dear Chairman Murkowski:

On behalf of the Industrial Energy Consumers of America (IECA), we support passage of S. 1221, the “Bulk-Power System Reliability Impact Statement Act.” The periodic reports on electricity reliability and reliability impact statements for rules affecting the bulk-power system would support oversight for these complex systems.

IECA companies are energy-intensive trade-exposed (EITE) industries, which means that relatively small changes to the price of energy can have significant negative impacts to our competitiveness. EITE industries consume 73 percent of the entire manufacturing sector’s use of electricity (26% of U.S.), 75 percent of the natural gas (29% of U.S.), and 82 percent of all energy from the manufacturing sector.

We thank you for your leadership on this important legislation and look forward to working with you.

Sincerely,

Paul N. Cicio
President

cc: Senate Committee on Energy and Natural Resources

The Industrial Energy Consumers of America is a nonpartisan association of leading manufacturing companies with \$1.0 trillion in annual sales, over 2,900 facilities nationwide, and with more than 1.4 million employees worldwide. It is an organization created to promote the interests of manufacturing companies through advocacy and collaboration for which the availability, use and cost of energy, power or feedstock play a significant role in their ability to compete in domestic and world markets. IECA membership represents a diverse set of industries including: chemical, plastics, steel, iron ore, aluminum, paper, food processing, fertilizer, insulation, glass, industrial gases, pharmaceutical, building products, brewing, independent oil refining, and cement.
