***Re: IECA Applauds Senate Passage of the “Energy Savings and Industrial Competitiveness Act” as an Amendment to H.R. 4850***

Dear Senator Shaheen and Senator Portman:

On behalf of the Industrial Energy Consumers of America (IECA), we applaud passage of the “Energy Savings and Industrial Competitiveness Act” as an Amendment to H.R. 4850 in the Senate. This legislation will help identify federal and state policy barriers to increased industrial energy efficiency, demand response and greater use of combined heat and power, and study cost-effective policy alternatives. These are all very positive initiatives. Energy efficiency is a powerful tool to increasing manufacturing competitiveness, jobs, capital investment, and reducing emissions.

It is an absolute fact that federal and state energy efficiency barriers exist. This bill takes an important first step in requiring the DOE to identify those barriers and provide guidance, identify past successful industrial energy efficiency policies, and provide cost-effective policies used by other manufacturing-based countries.

We applaud you for your leadership and tremendous support for the manufacturing sector of the United States and look forward to working with you on future job creating endeavors.

Sincerely,

Paul N. Cicio  
President
