MANUFACTURERS APPLAUD FERC'S APPROVAL OF THE ADELPHIA GATEWAY, LLC PIPELINE

WASHINGTON, DC – The Industrial Energy Consumers of America (IECA) applaud the Federal Energy Regulatory Commission (FERC) for approving the Adelphia Gateway, LLC Pipeline.

The Adelphia Gateway pipeline provides low-cost domestic natural gas to southeastern Pennsylvania. Manufacturing companies have spent tens of millions of dollars expanding their facilities and building cogeneration facilities to provide low-cost steam energy and self-generated power, which rely on this pipeline getting placed into service.

We are grateful for the Commission's action to approve the pipeline.

The Industrial Energy Consumers of America is a nonpartisan association of leading manufacturing companies with \$1.0 trillion in annual sales, over 3,700 facilities nationwide, and with more than 1.7 million employees worldwide. It is an organization created to promote the interests of manufacturing companies through advocacy and collaboration for which the availability, use and cost of energy, power or feedstock play a significant role in their ability to compete in domestic and world markets. IECA membership represents a diverse set of industries including: chemicals, plastics, steel, iron ore, aluminum, paper, food processing, fertilizer, insulation, glass, industrial gases, pharmaceutical, building products, automotive, brewing, independent oil refining, and cement.
