# Helping Clients Accelerate Their Decarbonization Journey

## Our Mission

With a commitment to promoting a **sustainable**, **resilient**, and **equitable** future, our team enables organizations to deliver on their strategic, financial, and sustainability goals by addressing today's key energy challenges: carbon, cost, complex choices, and creating energy justice across communities.

## Our Service Lines

## By the Numbers

**\$10B+** in energy spend managed

**11.2 GW+** of off-site renewable procurement

**48** of the Fortune 500 are clients

**280 million+** metric tons of CO<sub>2</sub>e avoided from renewable energy projects\*

## Our Credentials

**Partners with leading organizations**

Gold Climate Change Consultancy Solutions Provider

**Global presence**

Headquarters in London, UK, Utrecht, The Netherlands, and Irvine, CA. Regional locations across North and South America, Europe, and Asia

**+450 employees**

And over 150 years of collective industry experience among leadership

# Supply Chain Decarbonization Solutions

---

# Meeting Your Suppliers Where They are on Their Decarbonization Journey is Essential

At Edison Energy, we support our clients in supplier decarbonization through a variety of levers including education, data collection and validation, and implementation of decarbonization solutions.

It all begins with building a tailored strategy, then deploying the most impactful tools that best address supplier sites, processes, and products.

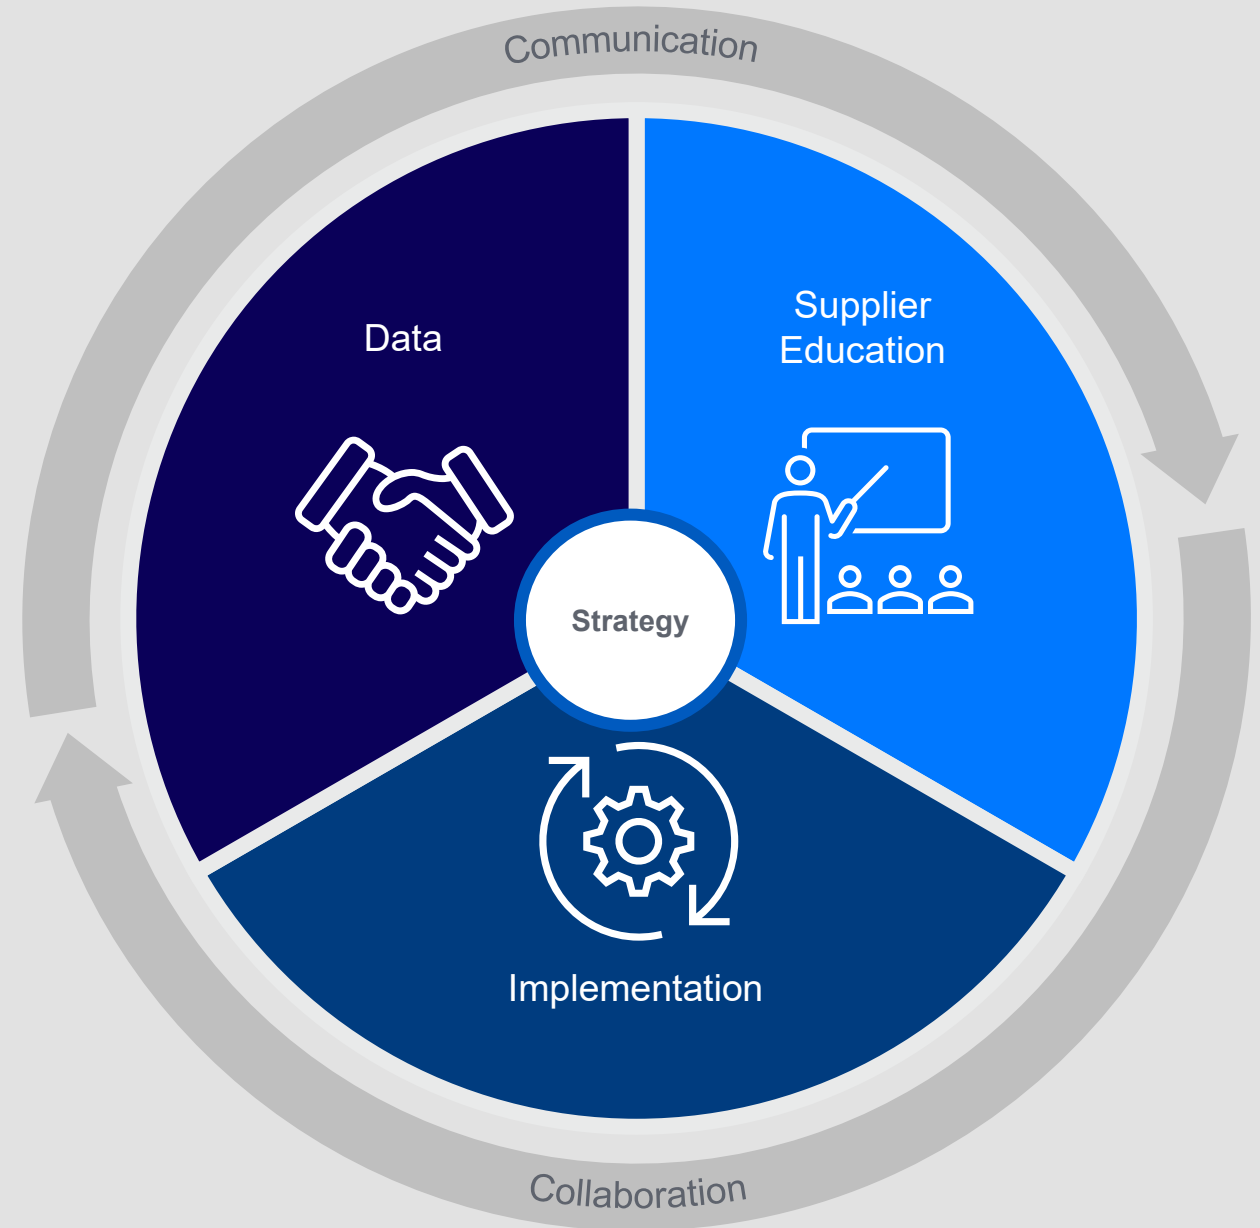

**“Edison Energy has been huge when it comes to education and support. We partner with Edison Energy so that our suppliers are getting the best customer service possible. That is how we’re going to achieve our goals at Honda because we need our suppliers to achieve their goals. We have approximately 500 suppliers that have already engaged with Edison and we have really great success stories.”**

*Alissa Yakali, Supply Chain Sustainability Manager Honda Development & Manufacturing of America, LLC (HDMA)*

**“[Edison Energy’s] webinar was clear and concise. I know exactly what is needed to be done.”**

*HDMA Supplier*

# Framework for a Successful Supply Chain Decarbonization Strategy

# Strategy: Setting the Foundation for Success

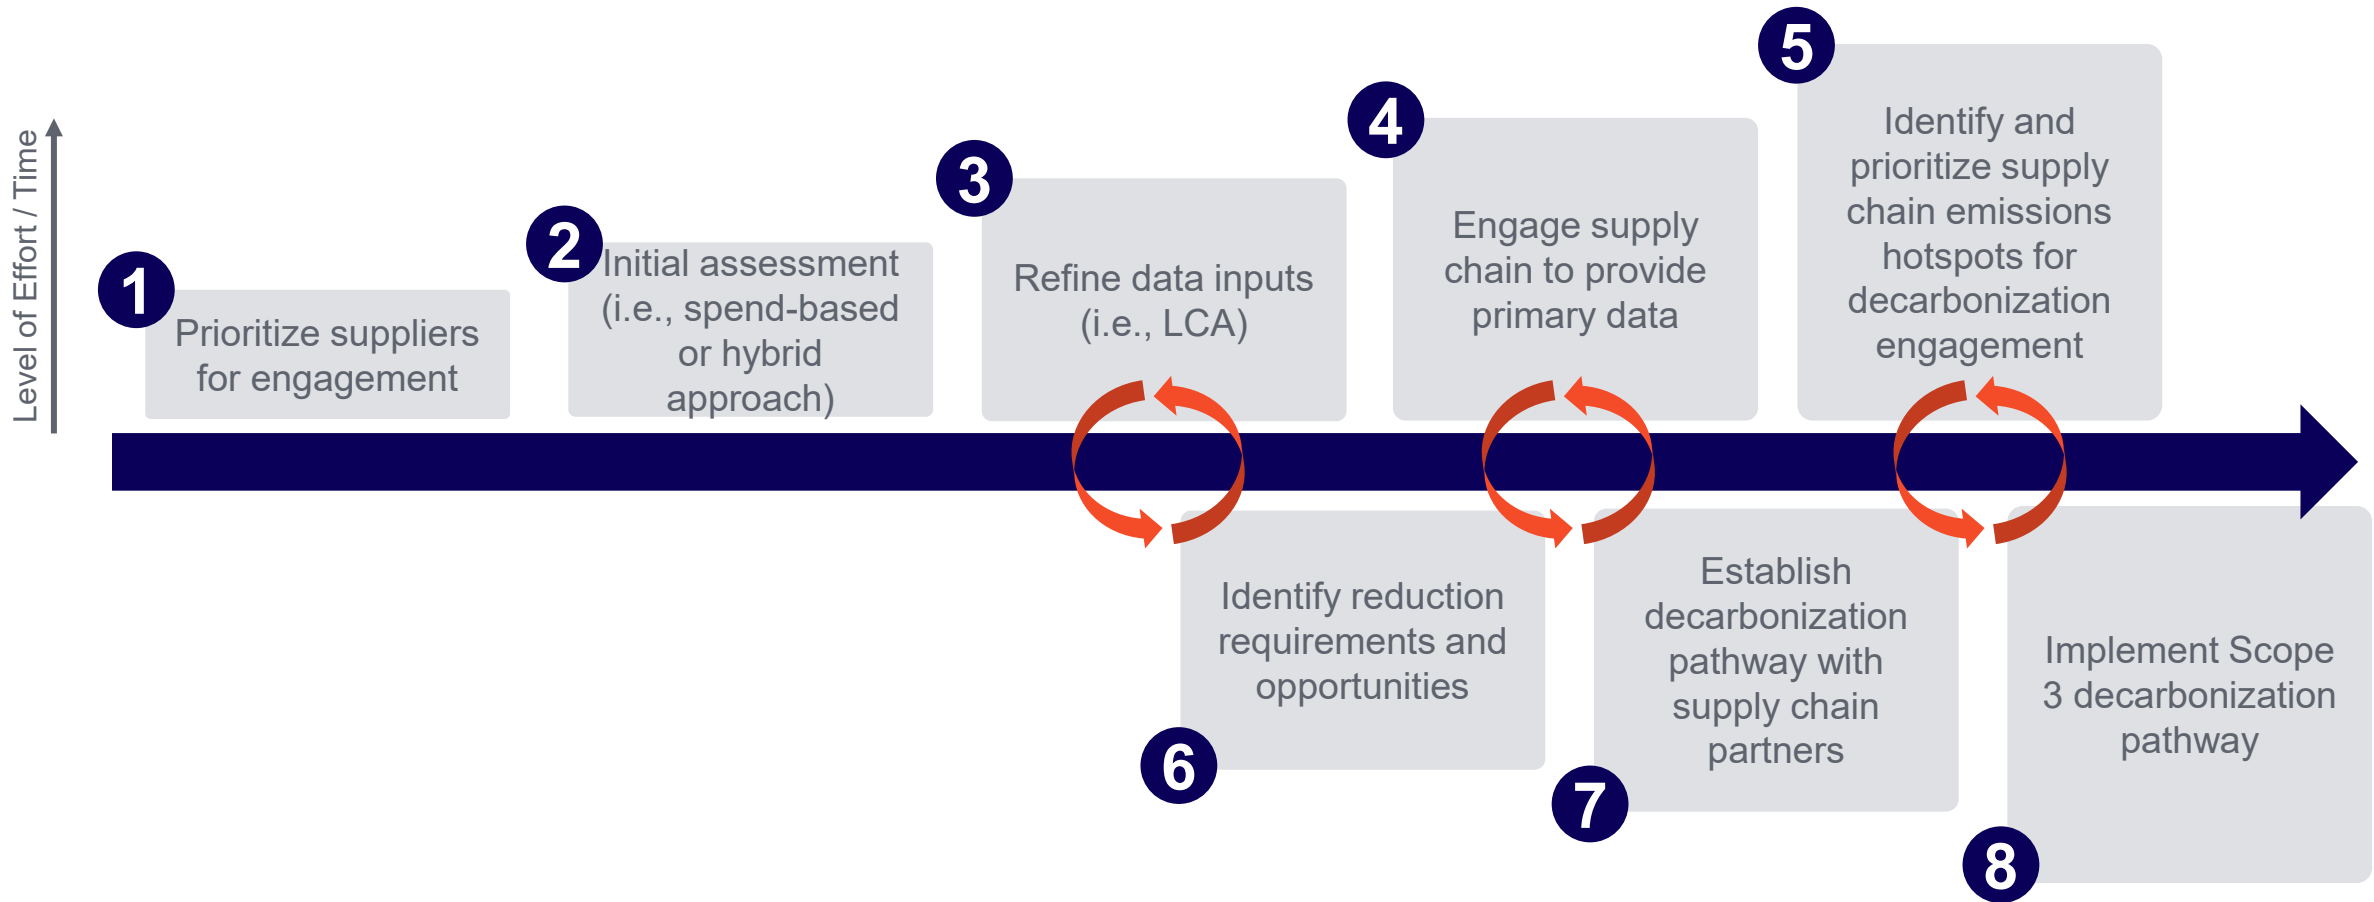

- ✓ Understand your company's supply chain decarbonization drivers and hotspots
- ✓ Demonstrate commitment to decarbonization leadership

- ✓ Determine level of ambition and planned target for supply chain reductions
- ✓ Consider which suppliers should participate and what do they need to achieve your target
- ✓ Align on year-one priorities

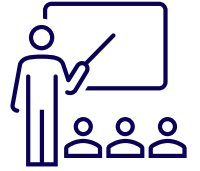

- ✓ Communicate clear expectations to suppliers
- ✓ Align resources to supplier needs
- ✓ Build data processes to measure success

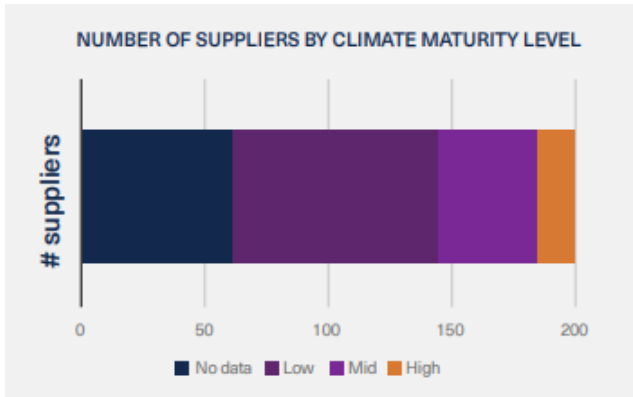

# Data: Evolving Supply Chain Decarbonization

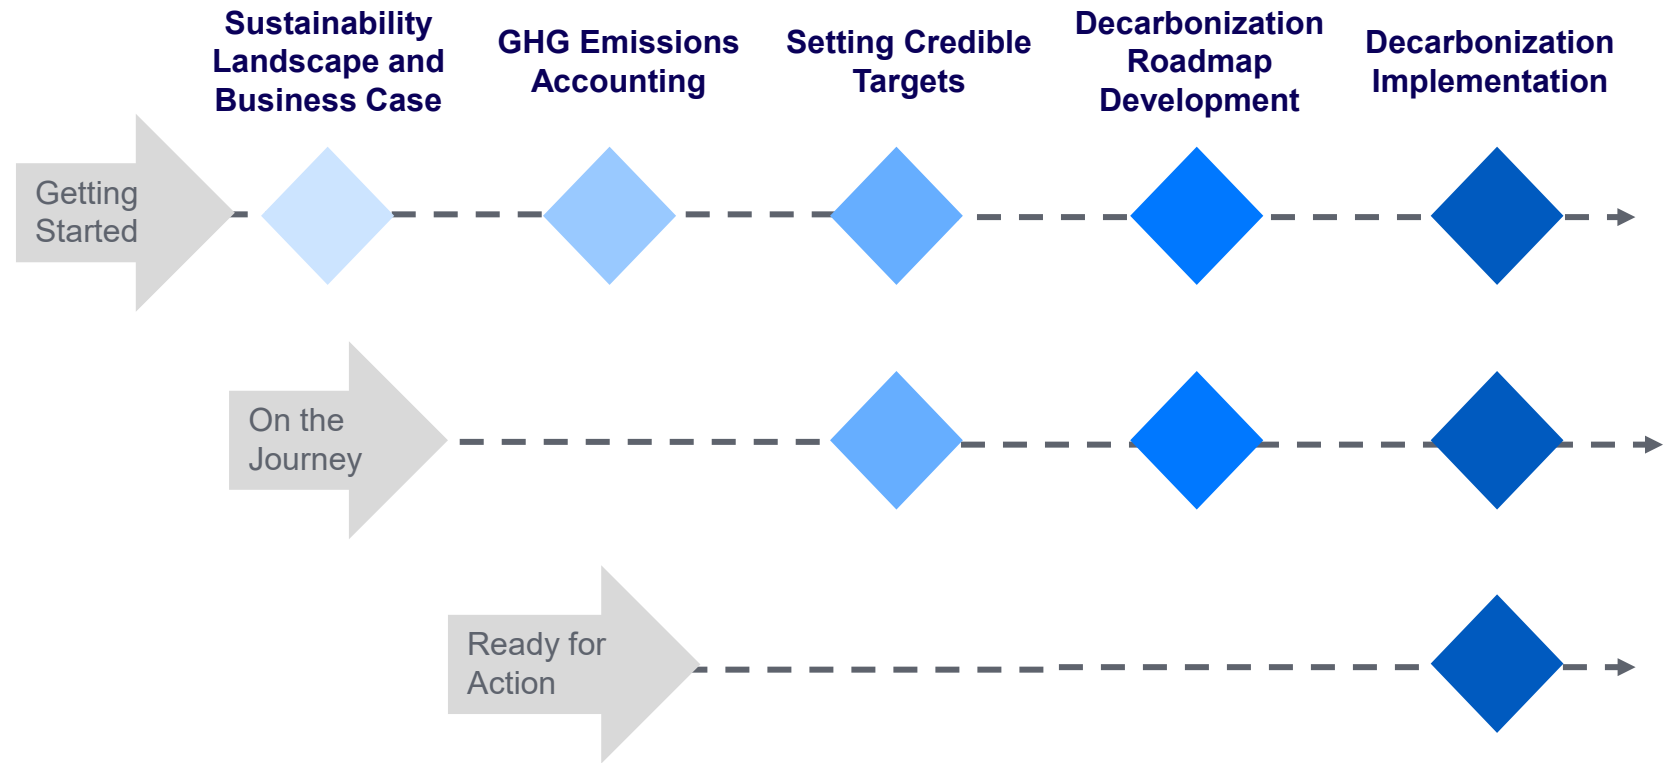

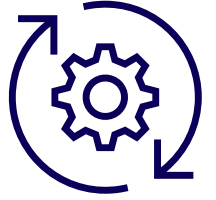

# Education: Customizing Engagement Based on Supplier Maturity

Source: [SBTi Supplier Engagement Guidance](#)

**85%**  
 Following an Edison Energy training series on decarbonization strategy, 85% of participating suppliers shared that they planned to take action

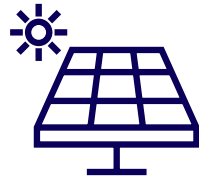

# Implementation: Leveraging Tools and Reduction Opportunities

## Avoid + Reduce

- Treasure hunts and shared learnings
- On-site energy optimization audits
- Third-party financing for project implementation

## Onsite Renewables

- Onsite solar PPA aggregation with suppliers in same regions
- Supply chain owner acts as anchor, suppliers able to add locations to RFP
- Pre-negotiated terms and pricing

## Offsite Renewables

- Retail delivered renewables where available
- vPPA aggregation with or without supply chain owner as lead offtaker
- Supply chain owner vPPA overbuy and EAC allocation

## Policy Support + Utility Engagement

- Utility engagement with top supplier utilities
- Aggregation of supplier load and interest in utility programs
- Identification of green tariff opportunities and support for participation

# Example Program: Edison Energy Support Offered to Suppliers

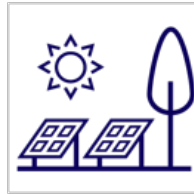

## 1:1 Consultation

### Office Hours

Reach out to schedule a conversation with subject matter experts at Edison Energy

- Education/Support
- Data Collection/Verification
- Implementation
- Collaboration

## Resources

### Energy Efficiency

Discover incentive programs in your state

### Retail Clean Energy

Explore offerings through utilities & retailers

### Solar, Wind & RECs

Determine if the opportunities are right for your site

## Webinars

### 101

Get started with Edison's foundational Sustainability Series

### 201

Prepare for a strategic initiative through Edison's Decarbonization Action Series

## Implementation

### Working With Your Suppliers to Implement Solutions Such as:

- Energy Efficiency and Electrification
- Onsite renewables
- Offsite renewables/PPAs
- Policy support and utility engagement
